Operating Instructions

The LG-105 is activated by a strategically located pressure pad. With a normal shooting grip, your middle finger will naturally hit the pressure pad whether shooting right or left-handed.

Please read entire owner’s manual prior to installing and using your new lasergrips.

Thank you for selecting the finest laser sighting system: Crimson Trace LaserGrrips and LaserGuard. When it comes to speed, accuracy and security, Crimson Trace is the top choice of law enforcement, militaries and legally armed citizens around the world.
Smith & Wesson J-Frame Round Butt

BATTERIES
Two (2) CR2032 or DL2032 Lithium Cells.

PRODUCT SPECIFICATIONS
BEAM INTENSITY: 5mW peak, 633 nm, Class 3R laser
DOT SIZE: Approximately 0.5 inches diameter at 50 feet
BATTERIES: Two #2032 lithium batteries; over four hours of illumination
ACTIVATION: Front-located integrated momentary pressure pad
WARRANTY: Three-year full warranty
This product complies with 21 cFR 1040.10

INSTALLATION INSTRUCTIONS
1. Make sure firearm is unloaded. Open cylinder and double check that cylinder is empty.
(See “Four Basic Rules Of Firearm Safety” in Laser Sight Owner’s Handbook.)
2. Remove existing grips.
3. Place both batteries into the right side panel positive (+) side up.
4. Line up right-side of Lasergrips to the roll pin on the right side of the frame and hold in place. Line up left side of Lasergrips to the roll pin on left side of frame and press both sides of grip together.
5. Install smaller diameter screw into the lower hole on the grip and larger screw in the upper hole and tighten grips to frame.
6. Attach “Aperture” warning label with the arrow pointing to the laser aperture. Attach laser “Danger” sticker to outside of pistol.
7. To activate Lasergrips, press pressure activation switch located in center of rubber front strap directly beneath trigger guard.
8. Confirm that laser and iron sights are in alignment. Laser dot should rest on top of front sight post with correct iron sight picture. Lasergrips are sighted-in at the factory to 50 feet, but can be fine-tuned to any point of impact by adjusting for windage and elevation. (See Laser Sight Owner’s Handbook for complete sighting information.)

LASER SAFETY LABELING
IMPORTANT: LASER PRODUCTS MUST ONLY BE OPERATED WITH THE SAFETY LABEL APPLIED TO THE FIREARM.
Labels could not be affixed to the product but are supplied and must be installed as indicated below:
A. Attach the “Aperture” warning label with the arrow pointing to the laser aperture.
B. Attach the “Danger” warning label to the outside of the firearm.
Use caution when activating the laser to avoid direct eye exposure, which can result in permanent eye damage. Follow all precautions as outlined by the firearms manufacturer.
Keep this and all firearm related products locked and secured from children or other unauthorized users.
