

HOLSTER RESOURCE GUIDE (2.0)

ABOUT THIS RESOURCE GUIDE

At Crimson Trace, we recognize that when considering the purchase of a laser sighting system, holster fit is a primary concern. Two of the most frequent questions asked by customers are:

**Will a Crimson Trace laser fit with my holster?*

**What holster do you suggest for my Crimson Trace-equipped gun?*

Fortunately, many Crimson Trace products have been designed to fit with your favorite holster - one of the many advantages of selecting a Crimson Trace laser. However, we do recognize that Laserguard®, Lightguard®, Rail Master™ and some Lasergrips® products will require a specific holster designed to accommodate these products.

The purpose of this guide is to provide you with holster options based on your model of handgun with Crimson Trace Laserguard, Lasergrips, (or other), as well as your preferred method of carry.

All holster suggestions within this guide have been carefully researched with the valuable assistance of the holster manufacturers listed. *Please note: this is not a comprehensive database, but only a small sampling of what is available in the marketplace. We encourage you to check with your favorite holster brand for more information on exact fit.*

In addition, many options listed are available in different color options, as well as many options for right OR left-handed shooters.

Crimson Trace Customer Service is readily available to further assist you with you needs regarding laser sights and holster options.

Phone: [1-800-442-2406](tel:1-800-442-2406)
